

BASAVARAJA HIRURU

Frontend Technical Lead | Senior Angular Developer

Bangalore, Karnataka 560016 | +91-7760744746 | basavaraj.hirur746@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Technical Lead and Angular Developer with 8+ years of experience leading and building enterprise web applications, including 2+ years in a technical leadership capacity. Proven track record leading Angular development teams, driving legacy AngularJS-to-Angular migrations, and mentoring engineers, while staying hands-on with architecture, reusable components, and performance optimization improving application load times by up to 30%. Comfortable balancing technical leadership with individual contribution in fast-paced Agile environments.

CORE TECHNICAL SKILLS

Frontend: Angular (10+), TypeScript, JavaScript (ES6+), RxJS, NgRx, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Vue.js

Angular & Architecture: Component-Based Architecture, Reusable Components, Reactive Forms, State Management, Lazy Loading, Code Splitting, Performance Optimization, REST API Integration, Karma and Jasmine Unit Testing

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Authorization

Databases: MongoDB, SQL Server

CI/CD & Cloud: Jenkins, GitHub, Git, AWS EC2, Nginx, Vercel, Render

Development Tools: Angular CLI, Postman, Chrome DevTools, VS Code, Jira, Figma

Methodologies: Agile, Scrum, Code Reviews, Technical Mentoring, Production Support

AI-Assisted Development: ChatGPT, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Lead Engineer, Web Development — HCLTech

Bangalore, India | 07/2022 – Present

- Lead frontend development and technical direction for enterprise-scale workforce management applications on Infor OS, using Angular, TypeScript, REST APIs, HTML5, CSS3, and Infor OS IDM widgets.
- Lead and mentor junior developers, conducting code reviews, resolving complex technical challenges, and establishing frontend coding standards and engineering best practices.
- Architected and delivered 15+ reusable Angular components, services, and Reactive Forms, reducing code duplication and improving development consistency across application modules.
- Led the AngularJS-to-Angular migration of 3 legacy modules, modernizing frontend architecture and improving maintainability, scalability, and performance.
- Improved initial application load time by 30% through lazy loading, code splitting, RxJS optimization, and frontend memory-management techniques.
- Designed and implemented JWT-based authentication and authorization for secure REST API integrations, including role-based access control across enterprise workflows.
- Managed Git/GitHub branching workflows and Jenkins CI/CD pipelines, supporting automated builds, testing, and production deployments.
- Collaborated with product, backend, QA, and cross-functional teams in Agile/Scrum environments to deliver features, resolve production issues, and support application releases.
- Engaged directly with clients and stakeholders to clarify requirements, define scope, estimate story points, and translate business requirements into technical solutions.
- Leveraged AI-assisted development tools, including GitHub Copilot and Cursor, for code generation, debugging, and unit-test development to improve engineering productivity.

Associate System Analyst, Web Development — Wunderman Thompson Commerce

Noida, India | 04/2021 – 07/2022

- Developed and maintained an enterprise e-commerce web application as a frontend developer, using Angular, JavaScript, HTML5, CSS3, and Bootstrap.
- Built new features, reusable UI components, and responsive web pages to enhance overall user experience.
- Developed UI components such as breadcrumb navigation, product pages, and promotional campaign modules for seasonal events including New Year and Christmas.
- Partnered with UI/UX designers and backend developers to integrate RESTful APIs and deliver user-friendly, responsive interfaces.
- Performed debugging, testing, and defect resolution throughout development and deployment cycles, ensuring high application quality and smooth production releases.
- Wrote clean, valid, standards-compliant HTML and CSS markup in accordance with industry best practices.
- Improved website performance by refactoring code and optimizing page load times, applying HTML, CSS, and JavaScript best practices.

Software Engineer — Spider Focus Solutions

Bangalore, India | 10/2018 – 04/2021

- Developed and maintained responsive web applications as a frontend developer using HTML5, CSS3, JavaScript, and Vue.js, ensuring cross-browser compatibility and optimal user experience.
- Designed and implemented reusable UI layouts, templates, and web pages based on business and design requirements.
- Maintained and enhanced HTML/CSS templates by implementing UI improvements, bug fixes, and performance optimizations.
- Collaborated with designers, backend developers, and QA teams to develop, test, and deploy new features following Agile methodologies.
- Built user interfaces for request creation and monitoring modules, ensuring responsive and intuitive application workflows.
- Participated in daily Scrum meetings, resolved UI issues, and provided technical support during development and deployment activities.
- Delivered end-user training and documentation for the Content Management System (CMS), enabling business users to manage website content independently.

Associate Application Developer — Accenture

Bangalore, India | 05/2018 – 07/2018

- Completed comprehensive induction training covering the Software Development Life Cycle (SDLC), SQL, HTML5, CSS3, JavaScript, Git, and Agile Scrum methodologies.
- Gained hands-on foundational knowledge of software engineering principles, coding standards, debugging techniques, and version control through practical exercises.
- Assisted senior developers in understanding project workflows, application architecture, and frontend development practices.
- Participated in Agile ceremonies, including daily stand-ups, to build early exposure to collaborative development practices.

ACCOMPLISHMENTS

- Completed a Node.js Backend Development course with hands-on projects, gaining practical experience in backend development and REST API implementation.

EDUCATION

Bachelor of Engineering (BE) — Sri Jayachamarajendra College of Engineering (SJCE), Mysore, India

07/2015 – 05/2018

LANGUAGES

Kannada, English, Hindi, Telugu
